

FEDERICO VALSECCHI

Game Audio Designer & Engineer · Music Composer · Unity Developer

London, United Kingdom · fede_v@outlook.com · +44 7376 743968 · fvalsecchi.com

SUMMARY

Game audio designer and engineer who both crafts and implements sound in-engine. Specialised in interactive audio with FMOD and Unity's native audio system, spanning SFX, Foley, ambience, dialogue and adaptive music, through to in-game mixing, balancing and runtime optimisation. Trained composer and orchestrator, and a hands-on C# Unity developer, so I own audio end to end from concept to in-engine behaviour rather than only delivering assets.

GAME AUDIO & DEVELOPMENT

Sound & Music Designer *Noni Games 2023 – 2025*

- Composed original adaptive music tuned to gameplay pacing and player immersion for Akakuma project.
- Designed and implemented adaptive audio (SFX and music) using FMOD and Unity's native audio engine.
- Built the C# gameplay systems that audio hooks into, including scene transitions, player movement, trading, weather, inventory and interaction/dialogue systems.

Version control with Git.

Unity Developer (external contractor) *Dingaloo Studios 2024 – 2026*

- Shipped CrossLocked on Android, re-architecting the netcode from its original topology to dedicated servers and implementing gameplay features with Netcode for GameObjects.
- Developed AR game prototypes integrating backend services for event-driven interaction and real-time updates.
- Version control with PlasticSCM.

AUDIO ENGINEERING & TEACHING

Lecturer, Multiplayer Game Development *Universidad Tecnológica Nacional (UTN), Argentina (remote, 2026- Present)*

- Authored and teach the multiplayer game development module of a university technical degree, covering Unity's networking stack, including Netcode for GameObjects and Netcode for Entities, and grade student projects.

Live Sound Engineer (external contractor) *SJARK (2025 - Present)*

- A1 and A2 engineering for events and press conferences on match days at West Ham United FC.
- A2 for live music events, handling location capture and live mixing under time pressure.

Freelance Mixing Engineer (Top Rated Pro) *AirGigs (2019 - 2023)*

- Deliver professional mixes for international clients across genres as a Top Rated Pro, with quality validated repeatedly through client ratings.

EDUCATION

BA in Music and Sound Production, First Class BIMM, United Kingdom 2019 – 2023

Video Game Development Diploma UTN, Argentina 2023

Professional Musician Programme EMC, Argentina 2011 – 2016

SKILLS & CERTIFICATIONS

Audio FMOD, Unity native audio, in-engine implementation and optimisation, sound design, Foley and SFX editing, dialogue editing, mixing and mastering, adaptive music, stingers and cues, composition and orchestration.

Tools Pro Tools, Ableton Live, Git, PlasticSCM.

Programming C#, Unity, DOTS.

Languages Spanish (native), English (C1, IELTS Academic).

Certifications Shader Development from Scratch (Unity 6), Udemy Learn Unity DOTS, English C1 (IELTS Academic).
